Monies in the Grant Funds shall be used for the purpose of providing payments to eligible applicants as provided in this act. SECTION 4. (1) From the date of the beginning of the period for applications for grants under this section, the Staff shall consider and review applications from any eligible applicant. Any project applied for by an electric cooperative must be for the purpose of the electric cooperative immediately installing broadband fiber on its electric delivery system and thereby facilitating the provision of broadband services by its broadband affiliate or an unaffiliated broadband provider. Any project applied for by a broadband provider must be for the purpose of the broadband provider's delivery of broadband services. All projects under each of the Grant Programs must be designed to immediately provide increased broadband services to an area or areas that have been determined by the Public Utilities Staff to be unserved or underserved according to the latest publicly available Federal Communications Commission broadband data. Under this act, electric cooperatives may only apply for and receive grants under the Cooperative Program, and broadband providers may only apply for and receive grants under the General Program.

(2) As to each of those specific Mississippi counties for which such information is requested by an electric cooperative or broadband provider, the Public Utilities Staff shall, by no later than July 10, 2020, specifically identify census blocks that are unserved or underserved according to the latest publicly available Federal Communications Commission broadband data. In order to create efficiencies in the administration of the Grant Programs and avoid the imposition of undue and unnecessary burdens on the Staff, a single electric cooperative or broadband provider may not request such information for more than three (3) counties and any requests for such information must be submitted to the Staff by no later than the close of business on July 7, 2020. The Staff shall provide its identification of such census blocks directly to the department and to each electric cooperative and broadband provider requesting the Staff for such information, and also provide such information to the public through a posting on the Public Utilities Staff's website. Each applicant shall rely on the Public Utilities Staff's identification of unserved and underserved census blocks in making its application(s) for Grant Funds and spending awarded Grant Funds.

(3) In an attempt to facilitate broader participation in the Cooperative Program, an electric cooperative's project or projects, for which grant monies are provided under this act, shall be considered pilot or special purpose projects and shall not obligate the electric cooperative receiving the grant monies or such electric cooperative's broadband affiliate to provide broadband access to the entire service area of the electric cooperative.

(4) For each dollar of grant monies requested for a project or projects by an applicant, the applicant must commit and spend a dollar of nongrant monies toward such project or projects. Universal Service Fund, Connect America Fund, or other grants awarded for broadband expansion through a separate state or federal program shall not be used for the required matching funds; but this limitation shall not include or extend to any loans of any kind. The primary application made by an applicant shall be for a grant totaling not more than Six Million Dollars (\$6,000,000.00).

(5) An applicant submitting a primary application may also submit a secondary application at the same time or soon thereafter with no maximum to the amount of grant monies that may be requested. The department shall first obligate all primary applications made that meet the eligibility criteria and are approved by the Staff. Then, if grant monies are still available the department shall consider and obligate any secondary applications that meet the eligibility criteria and are approved by the Staff. During the secondary application process, if one of the Grant Funds has unobligated monies remaining after all qualifying secondary applications are considered, then the State Fiscal Officer shall transfer those unobligated monies into the other Grant Fund for distribution in the secondary application process of such other Grant Fund.

(6) Any grant monies provided under this act shall be spent no later than December 30, 2020, or by such later date as may be specified in the guidelines, guidance, rules, regulations and/or other criteria of the United States Department of the Treasury regarding the use of monies from the Coronavirus Relief Fund established in Section 5001 of the Coronavirus Aid, Relief, and Economic Security (CARES) Act.

SECTION 5. (1) An applicant desiring to participate in one of the Grant Programs shall make written application to the Staff for a grant.

(2) Any primary application must be submitted on or before the close of business on July 17, 2020. A primary application must include the following: (a) a description of the applicant, (b) a description of the proposed project, (c) a project map depicting the projects unserved or underserved census blocks, as identified by the Public Utilities Staff, (d) an engineering map of the project, (e) an estimate of the total number of households along the route of the project, (f) the total estimated miles of fiber to be installed, (g) the proposed maximum speeds to be delivered both downstream and upstream, (h) the total estimated cost of the project, (i) the grant amount requested by the electric cooperative, subject, however, to the limit set forth in Section 3 of this act, and (j) confirmation by the applicant of its obligation under this act to refund any awarded funds in the event it is found by the Public Utilities Staff to be fully or materially noncompliant with this act.

(3) In order to assist with the payment of reasonable expenses the Public Utilities Staff will incur in the administration of the Grant Programs, any application for a grant under this act, whether primary or secondary, must include an application fee that is: (a) made payable to the Public Utilities Staff Regulation Fund, and (b) equal to one-half of one percent (1/2 of 1%) of the grant amount requested in the application. An application fee paid by an applicant shall be immediately returned if the proposed project is rejected by the Staff. In the event a requested grant is partially awarded, the application fee shall be reduced on a proportionate basis and the difference refunded to the applicant.

(4) The Staff shall expeditiously review the primary application submitted by an applicant and determine if the application and proposed project meet the criteria set forth in this act. On July 28, 2020, by close of business, the Staff shall notify the applicant and the department which primary applications have been approved. The department shall then distribute the approved grants to the approved applicant(s) by close of business July 31, 2020.

(5) In the event two (2) or more applicants submit projects that include one (1) or more common census blocks, the Staff shall determine which proposed project best serves that census block or blocks using the following criteria:

- (a) Maximum speeds, including both downstream and upstream,
- (b) Total miles of fiber to be deployed based on the entire application, and
- (c) Total value of the project, including both grant and match, with preference given to projects of greater value.

The applicant whose project is rejected based on the Staff's determination may, within three (3) days after the Staff's determination, revise its proposed project and refile an amended application with the Staff. The refiled project shall continue as the same designation (primary or secondary) as the rejected project.

(6) If after approval by the Staff of all primary applications, the department determines that the requested grants are greater than the monies in a given Grant Fund, the Staff shall determine a ranking of the primary applications for whichever Grant Fund is overdrawn. Such ranking shall be determined by the following criteria:

- (a) Maximum speeds, including both downstream and upstream,
- (b) Total miles of fiber to be deployed, and
- (c) Total value of the project, including both grant and match, with preference given to projects of greater value.

After the Staff has determined primary application rankings, it shall transmit said rankings to the department for disbursement. The department shall disburse Grant Funds in order of the primary application rankings until all the Grant Funds are disbursed.

(7) Any secondary application by an applicant shall be submitted on or before July 29, 2020, and meet the same application content criteria as a primary application. The department shall notify the Staff if there are any Grant Funds remaining after the department's distributions of Grant Funds for primary applications. In the event there are monies remaining in a given Grant Fund, the Staff shall review the secondary applications for approval. Upon its approval of secondary applications, the Staff shall notify the department of such application approvals by no later than the close of business on August 11, 2020, and the department shall distribute monies on a pro rata basis, as determined by the department, to all qualifying secondary applicants on or before August 14, 2020.

SECTION 6. (1) Each applicant receiving any Grant Funds under this act shall monthly file project status reports with the Public Utilities Staff. The initial project status report shall be due on or before September 15, 2020, and updates shall be provided on or before the fifteenth day of each month thereafter until such time as the project is completed. Such reports shall include the following information concerning the project: (a) a summary of the work performed, (b) an itemization of the expenditures on the project, (c) the number of miles of broadband fiber installed, (d) the number of residential properties along the route of the installed fiber, (e) the number of residential properties taking broadband service using the installed fiber, and (f) the estimated project completion percentage.

(2) Upon its completion of a project funded under this act, the applicant shall promptly file a notice of project completion with the Public Utilities Staff. The notice shall contain the same information as is required to be provided in a monthly status report.

(3) The Public Utilities Staff may, in its discretion, conduct field audits, onsite audits, or engineering reviews regarding the matters set forth in the report or notice. The Staff may also require the applicant to provide such additional or other information or documentation that the Staff determines is reasonably necessary to ensure compliance with this act and the United States Department of the Treasury regarding the use of monies from the Coronavirus Relief Fund established in Section 5001 of the Coronavirus Aid, Relief, and Economic Security (CARES) Act.

(4) Except for the total amount of an applicant's expenditures, any and all financial information contained within an applicant's application, monthly status reports or notice of project completion, including, but not limited to, the cost of fiber or equipment and any other itemized expenditures, is and shall be treated as confidential and proprietary information. Such confidential and proprietary information may be submitted by the applicant to the Staff and/or the department under seal; and such information, if submitted under seal, shall be exempt from the provisions of the Mississippi Public Records Act of 1983 and withheld from public disclosure.

(5) If the Public Utilities Staff, after reviewing monthly status reports or a notice of project completion, determines that an applicant's project is not in compliance with this act, the Staff shall so notify the applicant in writing and provide the applicant with a reasonable opportunity to bring its project into compliance. If the Staff thereafter determines that the applicant has failed to bring its project into compliance, the Staff shall provide written notice of same to the applicant and the department.

(6) If the Staff, after reviewing a notice of project completion, finds that a funded project is in compliance with this act, then the Staff shall provide a written notice of compliance to the applicant and to the department.

(7) An applicant found by the Public Utilities Staff to be fully or materially noncompliant with this act shall return to the state all or a portion of the grant monies received, as determined by the department. Applicants shall confirm their understanding of these terms in their primary and/or secondary applications.

(8) The Mississippi Public Utilities Staff shall ensure grant monies are spent in compliance with this act and in compliance with the guidelines, guidance, rules, regulations and/or other criteria, as may be amended from time to time, of the United States Department of the Treasury regarding the use of monies from the Coronavirus Relief Fund established in Section 5001 of the Coronavirus Aid, Relief, and Economic Security (CARES) Act. Upon request of the Governor, Lieutenant Governor, the Speaker of the House, the Chairman of the Senate Energy Committee or the Chairman of the House Public Utilities Committee, the Staff shall provide a report of the status of the Grant Programs, provided that said report does not disclose any confidential or proprietary information.

SECTION 7. If any section, paragraph, sentence, clause, phrase or any part of this act is declared to be in conflict with federal law, or if for any reason is declared to be invalid or of no effect, the remaining sections, paragraphs, sentences, clauses, phrases or parts thereof shall be in no manner affected thereby but shall remain in full force and effect.

SECTION 8. This act shall take effect and be in force from and after its passage.
